## international waste to art workshop

DATE: September 8<sup>th</sup> – 14<sup>th</sup> 2011

VENUE: Department of Fine Arts/Department of Industrial Design,  
ABU, Zaria, Nigeria

*Art is Everywhere* is a waste-to-art project initiated in 2005 by Ayo Adewunmi in collaboration with Alliance Francaise Enugu. The project objectives include rediscovering waste as a resource for artistic creation thereby drawing attention to environmental issues, providing an avenue of training younger artists and the less privileged in the society on how to make a living from recycling and it seeks to create inter-cultural exchanges between local and foreign artists.

With the completion of *Art is Everywhere 9* Workshop in 2010 over 200 artists have so far benefitted directly from the project; numerous others have been indirectly influenced through the exhibitions and publications. *Art is Everywhere 7* International Workshop in 2008 at Abuja featured artists from Uganda, Ghana, Togo and Benin Republic

*Art Is Everywhere 10* International workshop is scheduled to hold at Ahmadu Bello University, Zaria. The workshop is structured in a way that it will offer opportunity for artistic exchange between local and foreign artists. Participating artists will work with recyclable materials available within the environment for a period of one week after which workshop products will be exhibited for the public. Lectures and slide presentations will intermittently be given by resource professionals, while training sessions will be organized for selected Secondary school students during the one week workshop.
